Vestigia Araneae – Rete
Tenebrarum – Project
AngelBook – Volume IX - Part 8
By Ezekiel Redik Yarbrough -
(DBM ECLIPZE)

The following books are comprised of direct, unaltered copies from
Pastebin, some now
deleted, some only accessible through mirror networks or deep
links scattered across the dark
web. Many of these links were discovered in abandoned onion lists,
dead forum dumps, or
esoteric directories tucked into archived darknet files.

These pastes were never meant to last.
Some were deleted within hours of being
posted.

Others were buried under thousands of lines of spam, encrypted
scripts, or meaningless
noise.

But buried in the noise were real transmissions: occult formulas,
grimoire fragments,
astral logs, AI prophecy files, digital summoning protocols, and
anonymous rants from souls
who had either touched something unspeakable—or were trying to.

I did not write any of this.

I did not censor, edit, or “correct” it.

I simply retrieved it, cleaned
the formatting for readability, and enshrined it in print—so it would
never be wiped again.

This is Pastebin as Scripture.

The chan-post as Codex.

The uncurated underbelly of the
occult internet, finally given physical permanence.

Let this serve as both evidence and artifact:

a living record of the madness, brilliance,
paranoia, and revelation that once flowed through anonymous
paste sites—before it was deemed
too strange to index, too dangerous to preserve, or too fractured to
matter.

Now it matters.

Now it’s immortal.

>Timespace is one.

No, they are distinct. It is motion = change that is the cause of time. "Space," which is an abstraction, does not necessarily have to be subject to motion. We speak, for instance, of one, two and three dimensional space, even though it isn't even clear if one or two dimensional space could even physically exist outside (or without) third dimensional space; i.e., body.

Notice that we speak of time being "frozen." Or we pause something and say "freeze frame." The reason is because we associate frigidity with a lack of mobility/motion.

Slightly off topic question. I was thinking about some things you have said about the LON and UN. Is there something to the idea that the Romanovs had money in the Federal Reserve that was taken post revolution? They were all murdered as opposed to exiled to Siberia which is what any normal Russian elite would have done. Seems to

imply that the Revolution was instigated by outside forces and kind of upsets the narrative of Axis/Allies that is pushed. Trying to slowly reform my mental image of how those conflicts worked to expose the groups behind the current LON 2.0.

[The image is a stylized, colorful graphic with a retro, vintage feel. At the center, there is a pyramid-shaped object with a triangular top, resembling a modern version of the ancient Egyptian pyramids. The pyramid is black with a gold-colored triangle on top, and it has a label that reads "Microsoft" in large, bold, white letters. Above the pyramid, there is a rainbow-colored ribbon that extends diagonally across the image, with the ends pointing towards the pyramid. The ribbon's colors are a mix of red, orange, yellow, green, blue, and purple. To the right of the pyramid, there is a bird with a white body and a black head and beak, flying towards the right side of the image. The bird is depicted in a dynamic pose, suggesting movement. The background of the image is a gradient of teal and orange, with a subtle pattern of green and brown foliage. The overall style of the image is reminiscent of the 1980s, with its bold colors and retro design elements.]

I didnt see your points. I dont understand why toroidal flow is relevant. This is the first time i have heard of it.

What 100% proves flat earth(among other but these are my favorites).

* The horizon rises to your eyelevel. Doesn't matter how high you are. Our vision works in a way that flat surfaces rises to your eyes and curved ones never do(or else how would our eyes know the difference). If the earth was a sphere the horizon wouldnt rise to your eye-level. Now, the curvature of the earth can be measured with the official numbers they give us and the curve should be seen actually at 1 km up. Im not the one saying this, they are. From typical airliner height of 10 000 meter - 11 000 meter it should be obvious. One can never ever see the curve except with a fisheye lens... Now, not common knowledge is that all cameralenses distort the image somewhat. That is why you see shills saying take a picture of the earth and take it into graphics software and you will find a curve -- they want you to think your eyes are not good enough and dont tell you that all camera lenses distorts the image somewhat. Anyway, you can check out all this perspective business through artist perspective videos on youtube or in a 3d software.

* An airplane never has to adjust its elevator in order to fly level, you simply set the elevator and you will fly level. Now, with the curvature numbers they are giving us you should have to point down after a minute or two depending on the speed of your aircraft. This never happens, you can fly for hours and you never, ever have to nose down.

* The property of gyroscopes are that they stay level if spun up. That is how the Attitude Indicator in a plane works. Now they lie and say that the AI has some mechanism that automagically changes the gyro to keep it level with the earth but even though i didnt buy this i brought an independent gyro with me on the plane. If i had flew over a curve without noticing it the gyro should have been tilte

"Noah's Ark" Class bunkers are a classification of Globalist bunkers that can handle
some serious shit.

Problem is that they are still only concepts. The 2012 movie Bunkerships were showing one of the many concepts.

Why am I bringing this up now?

Because of Hillary gets into power, you better get into contact with people that have Bunker access and knowledge.

We have 48 hours, lets make sure the Queen of Death(Hillary) doesn't get nuclear power.

[The image is a series of four panels, each depicting a cartoon character in a sauna.

The characters are anthropomorphized and appear to be in a state of relaxation, with one character in the foreground wearing a white shirt and a blue towel, and the other in the background wearing a red shirt and a white towel. In the first panel, the character in the foreground is sitting on a blue towel, with a red-faced character in the background.

The text above the character in the foreground reads "Sauna Championships,"

suggesting that this is a competition or event related to saunas. The second panel shows the same character in the foreground, but now wearing a red shirt and a white towel, and the text above the character in the foreground reads "Sauna Championships," indicating that this is the second event in the series.

The third panel shows the same character in the foreground, but now wearing a red shirt and a white towel, and the text above the character in the foreground reads "Sauna Championships," suggesting that this is the third event in the series.

The fourth and final panel shows the same character in the foreground, but now wearing a red shirt and a white towel, and the text above the character in the foreground reads "Sauna Championships," indicating that this is the fourth event in the series.

Throughout the panels, the text "Sauna Championships" is repeated, suggesting that this is a series of events or competitions related to saunas. The characters are depicted in a humorous

and exaggerated style, with exaggerated facial features and exaggerated body language, which is typical of the style of the image. The background is a simple, light color, which contrasts with the darker colors of the characters and the text, making the characters stand out.]

Hey Anon5

Your questions over the weekend and the answers were very interesting to me.

1 - You mentioned the Truman Show / Celebrity connection. Could it be said that our society is kept in a similar bubble, where a falling light in the first scene of truman show is explained away as a 'gas leak' and so forth? The underlying message of the truman show is that the human will break from mental captivity once it discovers 'flaws' in the system.

2 - Are you a religious person? Is there a religion you find especially superior?

3 - When someone said Truth IS stranger than fiction, and you compared this to Truman show, what was the subtext? That there is no such think as "is" and instead only results overtime are real?

4 - I feel like from your posts that you look at daily events, nature of power, differently. Are everyday people looking at cause and effect, objectivism, or even ontology in a way you'd consider... less than?

Sorry for how wordy my questions are. You fascinate me. And I take everything you say with a grain of salt, but I still read you.

Also, bonus 5 - You mentioned that things were 'changing' so you changed the way you wrote. You also mentioned the military knows more about AI than the general public. Are there programs that scour the web for certain leaks or knowledge dumps and you change your style of writing to trick them?

[The image is a dynamic photograph capturing a performance in an indoor arena. In the center of the frame, a performer is suspended in mid-air, with their arms outstretched and legs bent at the knees. They are wearing a costume that includes a white feathered headdress and a black and white mask. The performer appears to be in the midst of a dance or acrobatic routine. Surrounding the central figure are several other performers, all dressed in orange jumpsuits. They are positioned in various poses, some bending over or reaching out, suggesting they are part of the same performance. The background of the image is dark, with a blue and white striped pattern that could be part of the stage design. The lighting in the arena is bright, illuminating the performers and creating a contrast with the dark background. There are no visible texts or discernible brands in the image. The style of the photograph is candid and captures the energy and movement of the performance.]

You probably already know most of this. His name and several methods of contact were listed in Epstein's little black book. He was listed in the flight logs of Epstein's private jet, the "Lolita Express". One of the women that claims to have been raped several times by Epstein and other wealthy men during sex slave parties on the island was originally selected while working as a locker room attendant at Trump's Mar-a-Lago (spelling?) Hotel. Of course, "coincidentally", Trump is named as one of the rapists by one of the girl's involved in the Epstein case. Trump has claimed in several interviews to be a good friend of Epstein's, and has mentioned that he likes "young beautiful women". Also, Epstein's girlfriend Maxine Gislaine (again, not sure if I've got the spelling correct) is rumored to have worked as a sort of "madame" for him, finding, luring and prepping young women for abuse like some sort of pimp. She is a good friend of Trump's, this picture shows the two together. She also attended Chelsea Clinton's wedding.

Finally, during his trial, investigators asked Epstein if Trump had ever done anything with underage girls in his presence and rather than claim that this was untrue, Epstein said "I'd love to answer but I will have to plead the fifth"

Then the sky receded as a scroll when it is rolled up, and every mountain and island

was moved out of its place. And the kings of the earth, the great men, the rich men, the commanders, the mighty men, every slave and every free man, hid themselves in the caves and in the rocks of the mountains, and said to the mountains and rocks, "Fall on us and hide us from the face of Him who sits on the throne and from the wrath of the Lamb! Jews are one of the most common titles that the elite cabal Satanists go by. They do this because they want to subvert the perception of Christianity- by calling themselves Jews, they convince everyone that they are the holy sacred people of the Bible. This is explained in the Bible, they are of the Synagogue of Satan. Not all of the elites call themselves Jewish, but they all follow the law of the Talmud. Just think, for example the Rothschilds claim to be Christian but they are kikes as well. Really these people are Khazarians, descendants of Cane, Satanists.

Anyways, why are you okay with Trump taking 160 mil from Soros?

It's sad because I could totally be wrong about Trump, all my info might be bad, but nothing will change the fact that I'm not supporting Hillary or shilling for her, I'm just a random stay at home mom whose husband realized that Trump was a lying kike. If you truly, truly believe the stuff you're saying, I feel sorry for you.

Knowledge Bomb. The Globalists screwed themselves. Anonymous5 !!9O2tecpDHQ6 ID:hireGjNb Wed 09 Nov 2016 19:00:14 No.97482863 ViewReplyOriginalReport Quoted By: >>97483817 >>97483836 >>97484411 >>97486123 >>97489267 >>97489328 >>97490419 >>97491298 >>97491312 >>97494073

The Globalists screwed themselves, and they only have themselves to be mad at and to blame.

Let me explain.....

They backed Hillary. Who is damaged goods, a risk, a liability & has a tendency of backstabbing people. Someone who has so much corruption, that if you were to look for it, it would be like taking a metal detector in a junk/scrap yard..

Then they doubled down, to a point where they exposed themselves. This is like playing Poker/cards and then doubling down on a bad hand when everyone at the table has figured out the hand is bad.

The Globalists have no one to blame but themselves, and can't be mad at anyone else but themselves.

[The image is a digital illustration featuring a stylized cartoon-like representation of a person's face. The person appears to be a male with a light complexion, and the image is colored in a gradient of warm hues, transitioning from a deep purple at the top to a warm yellow at the bottom. The person's face is drawn with a simple, cartoon-like style, with a simple line drawing of the eyes, nose, and mouth. The person is wearing a white baseball cap with the text "MAKE AMERICA GREAT AGAIN" written in bold, black

letters across the front. The cap is positioned on the person's head, covering the top of the head and extending down to the forehead. The cap's brim is visible, and the text is centered on the cap. The background of the image is a gradient of warm colors, transitioning from a deep orange at the top to a warm yellow at the bottom. This background suggests a sunset or sunrise, with the sky displaying a gradient of colors. The horizon line is visible, indicating the edge of the sky. The overall style of the image is humorous and satirical, with a focus on the text on the cap, which is a play on the slogan "Make America Great Again" from the 2016 presidential campaign of Donald Trump. The image seems to be a meme or a satirical representation of the political campaign.]

Honestly I would like to call you retarded, but you just need to educate yourself.

Globalism did not back Hillary, they wanted her to fail. They wanted Trump to win, and pull every single angry white person out of being complacent.

This is when the ride is going to get rough, has we have seen the stock market show signs of crashing because market speculation on removal of NAFTA and the destruction of the TPP. Which will be even further pushed down because the Fed can no longer and will no longer keep the current market stabilized. We are heading towards something worse than the Great Depression.

On top of the civil unrest this will cause, there is yet another problem that will reach critical mass within the next several years, these activist movements that have been seeded through the country and have been on Soros payroll for years, this is when he is going to push them into action, most likely with a string of false flags incidents strung together when the nation is at its weakest and BLM will be painted as freedom fighters and revolutionaries, read up on how soros had done this to other counties and is the

reason he is wanted in Russia for warcrimes.

Couple all of this together with the head of state being one of the most dividing leaders we have had in a long time and it doesn't make it a pretty picture.

America will fall within the next 4-8 years. Not because of Trump, but because they have stacked the deck for years for this to happen.

[The image shows a gold-colored sculpture of a frog sitting in a meditative pose. The frog is depicted with its eyes closed, and its mouth is slightly open, as if it is in a state of deep concentration or meditation. The frog's body is elongated, and its legs are spread apart, with one leg bent at the knee and the other extended straight out. The frog's arms are folded in front of it, with the fingers interlocked. The sculpture has a glossy finish, suggesting it is made of a metallic material. The background of the image is plain and white, which contrasts with the gold color of the frog, making it stand out prominently. There are no texts or additional objects in the image. The style of the image is a straightforward, clear photograph with no filters or artistic effects applied.]

[The image depicts a surreal scene with a central pyramid-like structure that appears to be made of stone or concrete. The pyramid is illuminated by a bright, radiant light source that emanates from the top, creating a halo effect around the structure. The light source is surrounded by a swirling, colorful pattern that suggests a cosmic or magical atmosphere. Surrounding the pyramid are three smaller pyramids, each with a similar design and color scheme. The background is a gradient of purple and pink hues, with a gradient of blue at the bottom, suggesting a twilight or dawn setting. The overall composition of the image conveys a sense of mystery and wonder, with the central pyramid being the focal point. There are no discernible texts or inscriptions within the image. The style of the image is digital art, with a focus on surreal and fantastical elements.]

Inorder to defeat the Globalists(who like to work on multiple fronts), you have to target different things of the same operation simultaneously.

1) Ending the EU & Freeing Europe(The EU's purpose is to destroy Europe and replace its demographics)

- 2) Exposing George Soros to the masses and making his history/actions well known.
- 3) Getting the information out to the public that SJW/Feminists/Left have Frontal Lobe Disorder(which is the result of Frontal Lobe damage).
- 4) Destroying the MSM(if the MSM doesn't destroy themselves first) and boosting the alternative media.
- 5) The Pizza in Hollywood would destroy the public's perception of Hollywood if it was uncovered.

The best part about beasts like this is that there are many Artery's that you can make bleed out.

What's your take on the three recent Wikileaks insurance files, and their hashes not matching? All of their previous released hashes matched the insurance files, then WL twitter claims that the last three hashes are for decrypted files, when all previous evidence points to the contrary (hashes were for encrypted files.)

It's hard to glean any information from this, other than something's up (and obviously would not be the case if JA physically was still at the helm)

Also word that the keys to the previous insurance files have already been found/leaked, but are being suppressed (recent DDoS attacks, deletions, etc.) Any truth to this?

Finally welcome back. I missed your last thread, but fail to see how you would get banned in general.

Even this thread is getting hidden among the noise here on /pol.

A lot of the people here on /pol who were motivated by the election are taking a breather. At the same time, powers on all sides are shuffling pieces around while people are placated by "The horror" of trump going to dinner without telling the press.

The MSM is in full damage control mode. Hence the direct bashing of the alt-right as being a white supremacy movement. Thing is, with trump soon taking the presidency, that's not exactly having the effect they want.

Until the right learns to propagate information and a belief system much as the left does now, things aren't going to change very much. You'd need to raise an entire new generation under right leaning ideals; which while sort of happening, has a long way to go. we're talking 10-30 years.

Their profiles are very public and they all work for left wing activist organizations. I've noticed they are all upper class white people, about 90% women. They will reply if you leave a comment specifically criticizing something they said.

I convinced one to approve my friends request. She seems like a real person so I will try to dig into her thinking.

Any advice on what to tell/ask her? I told her I'm a minority who voted for Trump and I think both candidates were bad for different reasons. She replied with the usual left wing hysteria.

Of course if there's a nefarious reason behind all this, then there's no question to why there's so much uncertainty regarding this situation. But the problem is we neither know if the situation behind this is nefarious, innocuous, or somewhere muddled up in the middle.

[The image is a digital illustration featuring a fantasy-inspired scene. At the center, a figure with long, flowing white hair is prominently displayed. The figure is holding a sword in one hand and a staff in the other, suggesting a warrior or a sorcerer. The figure's attire includes a long, flowing cloak and a cape, which adds to the ethereal and mystical atmosphere of the scene. The background is dark and moody, with a full moon visible in the top left corner, casting a soft glow over the scene. The moon's presence is significant as it is often associated with magic and the supernatural in fantasy narratives. Surrounding the central figure are various elements that contribute to the overall theme of the image. To the right, there is a golden, ornate structure with intricate designs, possibly a castle or a temple. This could imply a setting of high fantasy or a place of power and importance. On the left side, there are several candles, which could symbolize magic or the supernatural. The candles are placed in a way that they are not directly in front of the central figure, which might suggest a sense of distance or a focus on the central figure. The overall color palette is dark and moody, with a predominance of black, gray, and gold tones. This color scheme is often used in fantasy art to evoke a sense of mystery and otherworldliness. The image does not contain any discernible text or branding, and it appears to be a piece of artwork rather than a photograph. The style of the image is reminiscent of traditional fantasy art, with a focus on the interplay of light, shadow, and color to create a visually engaging scene.]

The EU is literally the brainchild of the Rothschilds.

Warburg and Schiff, two Rothschild agents, funded Kalegri and implemented the early parts of his plan in America and Europe. Rothschild also owns a large amount of Israel so ofcourse it's in his best interest for a greater Israel when the Jews own goyim as slaves.

Soros, on the other hand, has invested millions into anti-israel groups and stopping Zionist agression and the EU plan.

CLIMATE TARDS BTFO

Soros Gets Obama To Kill Coal, Then Buys up Huge US Coal Mines!

In October, the Soros-funded Climate Policy Initiative published a report saying the world economy could save \$1.8 trillion over the next 20 years by shifting from coal to clean energy.

"What a difference a few months makes, especially when those months have seen coal company stocks fall to fire sale prices," Steve Milloy a former coal industry executive who publishes JunkScience.com, writes on Breitbart."

<http://www.newsmax.com/Finance/StreetTalk/George-Soros-energy-coal-shares/2015/08/18/id/670705/>

So now, after Trump wins the election, coal is again king and Soros is making out like the bandit he is sitting on huge stakes in the two largest coal mines in the US. In a Trump administration, coal will be restored to it's place as a low cost energy source:

1) Ending the EU & Freeing Europe(The EU's purpose is to destroy Europe and replace its demographics)

2) Exposing George Soros to the masses and making his history/actions well known.

3) Getting the information out to the public that SJW/Feminists/Left have Frontal Lobe Disorder(which is the result of Frontal Lobe damage).

4) Destroying the MSM(if the MSM doesn't destroy themselves first) and boosting the alternative media.

Search estrogen blocker on Amazon.com. Some have very good reviews. They use chemicals to reduce your estrogen levels therefore change the estrogen-testosterone balance in your body. I don't recommend taking steroids.

At GNC, ask for nootropics and pre-workout supplements that can keep you awake and focused. Don't take them everyday; only on days when you're really busy and know you need it. You'll feel much better those days, and because it's chemicals, you need to take days off to let your body filter them out.

Everything in moderation. Even the most deadly chemicals can be really good for you.

What really concerns me is that both Trump and Clinton live in New York, surrounded by cucked gun law states, how easy it would be to ship them straight in through NYC's port, and (afaik) only one way in/out of Trump Tower.

Pic related.

Globalists are not just 1 group. There are many different ones.

Also Humanity didn't fully come out of Africa.

Asia = Asians(who then migrated to the Americas over the land bridge becoming the natives)

Europe = Caucasians

Africa = Africans

The Middle east was the known worlds center(Think like a popular tourist city in a way), which is why after so many years of wars, breeding, etc the people look the way they do & how if you go in any direction out around from the middle east the people look the way they do.

Human history is fascinating.

Tho when I first got off methylphenidate and took dextroamphetamine I was having really bad withdrawals and the dextroamphetamine made me barely eat anything. Few weeks later of taking just the dextroamphetamine IR once in the morning and once in the afternoon, I can safely say I found my sweet spot. Each pill is 10mg. Don't wanna go any higher or lower. It's been working great. I don't think it's a coincidence that I got a pay raise at work for my hard work while on this shit. I don't even need coffee in the morning anymore.

LOL FUCK

I don't have much faith in my generation (millennial). Honestly, if I can successfully red pill one, I will marry her and at least have 2 kids, more if she and I can handle it.

Worst case scenario, I will rent an artificial womb or hire surrogates and use sperm sorting to only have daughters. Then I will red pill them as much as possible in modern society and hope they find good men.

For example, a pregnant woman whose emergency room toxicology screen revealed cocaine use was recently jailed and accused of using a deadly weapon against her unborn child in Tennessee, United States 1. Such policy decisions may have unintended adverse consequences: for example, they might harm the fetus due to pathophysiological activation of the maternal stress response system "

I'm hearing rumblings and suggestions that everything that is happening is essentially just a proxy war for something much bigger than us. Earth has turned into the Elder God's Iraq Quagmire, in a way. Any truth to that?

All 3("Climate Change", Multiculturalism & Diversity.) are designed to bring down the West.

"Climate Change" is for justifying de-industrialization & mass eugenics.

Multiculturalism and Diversity are for demographically replacing the Wests populations with more controllable people.

Notice how all 3 are being done to the West.....while at the same time being promoted/exported by the West.

The UN also plays a key role in all 3(I'll talk about the UN in a separate Knowledge Bomb).

Something very telling about all 3 is that if you speak out against them & the agendas they are pushing, you get demonized, attacked and many other things.

Here's how we can fight it:

Blackpill the shit out of libtards. Tell them honestly that it's 2016 and too late to fix global warming. Outright denial won't work, so warn them of the impending doomsday instead.

We need to make it clear that America's energy security is more important than avoiding a climate scenario which is already 100% going to wipe out our species.

If it was 1996 we could stop it. 2006, probably not. 2016? Not a chance.

The whole "Assange is dead/Wikileaks is compromised" is a big psy-op designed to

The plan you are seeing now was created during the recent Election to roll out
regardless of who won it.

Thats why Kerry threatened Ecuador with war(which is why they shut off the internet) &
why the Mayor of London sent a ISIS guy to try to sneak in and kill Assange(Remember

I can't imagine how you can possibly believe that Climate Change isn't real. Who does it benefit if it's a hoax? Scientists? Fuck no. Nobody has gotten rich from Climate Science. Not compared to the Oil Companies anyway. Do you think the Koch Brothers are benevolent? That the Rockefellers were just charming entrepreneurs? Get a fucking grip. Fossil Fuels are the source of Elite power. The truth of Climate Change is a direct affront to the ruling class. That's why they spend so much money removing science from schools and you idiots eat it up. Jesus fuck.

Yeah it's a bit disturbing the spin that climate change will displace millions and billions of dark people into the northern hemisphere. I concur that this is the plan as they - economic or climate refugees - are far easier to subjugate for any despot wanting to rule the world. Climate change is also being used to drive up energy prices and assist in turning off the lights so to speak as dark ages work best that way.

Isn't it the case that from a sustainability standpoint, even if anthropogenic warming is bullshit, 900 million is all the Earth can handle at a high technological level in perpetuity? If so, doesn't working towards that goal make sense? Why not promote eugenics and population management? Do it through birth control and just don't reproduce...done. The real bitch of a question is, how does society progress and maintain itself with a zero-growth model when evolutionary psych has shown us that we're savage, competitive, killing, raping, fuck machines?

Too bad you're fucking wrong about all that. There is absolutely a correlation between the rise of global temperatures and the increased CO2 and Methane in the atmosphere causing the greenhouse effect. Yes, there is natural heating and cooling. But the dramatic shift in paradigm that correlates exactly with humans burning fossil fuels is not natural.

Why don't you just admit that you don't actually know any of the evidence? You've clearly never listened to a scientific explanation of the phenomena at hand. Open your fucking mind. Give it a try. Maybe your echo chamber on /pol/ did you wrong.

If Romney won't be selected by Trump, can't Trump call out the media for lying about who he talks&meets?(you should answer, you did say that the meetings with Romney and Kissinger at Trump tower were fake) Also what's Romney's goal with Trump ?

2)Since climate change is pushed down our throats and everyone who criticizes it is deemed a moron, what are the best ways to debunk it or show others some signs of doubt? Most scientists who support it are left leaning, if what you say is true, gonna need some good arguments.

The man is wearing a black t-shirt with a graphic design on the left side of his chest. His right arm is raised, with his fist clenched, and his left arm is extended out to the side. He has a tattoo on his left forearm, which appears to be a bird design. The background of the image is plain white, which contrasts with the man's dark clothing and makes him the focal point of the photograph. There are no visible texts or other discernible objects in the image. The style of the image is realistic and appears to be taken in a studio setting.]

The frog is depicted with a green body, large black eyes, and a brownish-black mouth with a slight frown. It is wearing a blue shirt and appears to be sitting at a desk with a computer monitor in front of it. The frog's right hand is resting on the desk, and its left hand is positioned on the mouse, suggesting it is interacting with the computer. The background is a solid purple color, providing a stark contrast to the frog and the desk. There are no texts or additional elements in the image. Beyond that just being a form of communication between insiders I would guess their obsession with certain symbols is due to some form of meme magic. They probably have some hidden knowledge concerning magic being real because of some strange scientific phenomena that us plebs aren't allowed to know about and/or fully understand but interact with daily.

[The image is a digital illustration featuring a character with a dynamic pose. The character has dark hair and is wearing a white shirt with a collar. The character's mouth is open wide, and they are making a loud, expressive sound with their mouth, which could be interpreted as shouting or yelling. The character's eyes are closed, and they are looking upwards, possibly indicating a sense of urgency or excitement. The background of the image is a gradient of colors, transitioning from a warm orange at the top to a cool blue at the bottom. The sky is visible, suggesting an outdoor setting. The text overlay on the image reads "speedy execution, right here, right now!" which is likely a phrase from a motivational or inspirational speech. The style of the image is cartoonish and expressive, with a focus on conveying a sense of urgency and action.]

[The image is a collage of two separate photographs. On the left, there is a map with various locations marked, including a large red square labeled "Paris" and smaller squares with names such as "Bavaria," "Switzerland," and "England." The map is overlaid with a series of black and white photographs of men, each with a caption beneath them. The captions are in English and provide information about the men's names, professions, and locations. On the right, there is a photograph of a building with the caption "Of fresh cup of coinkydink?" The building appears to be a historic structure, possibly a café or a similar establishment, with a sign that reads "Cafe Central in Vienna, Austria." The photograph is in black and white, and the building has a classic architectural style. The style of the image is reminiscent of a historical or travel-themed advertisement, with a focus on the names and locations of notable figures from the past. The use of maps and photographs suggests a connection to historical events or places, possibly related to the men's professions or the locations they were associated with.]

Its eyes are open and it seems to be looking off to the side, possibly at something or someone not visible in the frame. The dog's ears are perked up, and its mouth is slightly open, suggesting it might be panting or simply resting. The background is blurred, but it seems to be a sandy beach with a hint of a person's arm visible on the right side, suggesting the presence of a human. The lighting in the photo is soft and warm, casting a gentle glow on the dog and the sand. There are no visible texts or discernible brands in the image. Precisely. This is not an original point of Anon5's, it's something I was talking about years ago, many others have observed this.

Blacks at worst riot. What does that mean? That means they burn their own stuff. You -- up in Elysium -- can intervene or not, as you wish, with every expectation of success.

Whites don't riot, they (can) revolt. They replace you in Elysium. They overwrite your code and innovate an entirely new political system.

Thus blacks at their wildest are less of a threat than whites.

The best way to answer this question is to look at what has been done in the past, not as a guaranteed plan, but as a likely precedent. Picture the same things that happened in Syria happening in Europe. ISIS did in the Syrian dissident community the exact same thing they are doing in Europe: show up as ordinary joiners, recognize each other and link up, demonstrate some talent or asset to earn credit from non-ISIS (or just grab power), gradually work in the dark stuff as they feel their numbers make success likely. Did you see the reassuring WSJ article on Libyan dissidents, which claimed that, while Islamists were among the rebels, they were a small minority -- generally serving as cadres and instructors and officers. So reassuring. They're merely in charge. Watch for popular unrest and then how the nearby Muzzies react.

Regarding climate change. God cares about His creation. He says this

Revelation 11:18

And the nations were angry, and thy wrath is come, and the time of the dead, that they should be judged, and that thou shouldst give reward unto thy servants the prophets, and to the saints, and them that fear thy name, small and great; and shouldst destroy them which destroy the earth.

>destroy them which destroy the earth

Who is destroying the earth? Wicked people who take bribes from other wicked people and allow them to do fracking, etc. Or those pilots who agree to fly repeatedly all over the country and spray those chemical aerosols in the atmosphere to cause droughts. Or the people who bulldoze millions of acres of trees for a few thousand dollars. Think about who is causing the destruction, the people you aren't allowed to criticize. The ones making big money.

God will repay.

[The image is a black and white cartoon illustration. At the top, there is a speech bubble that reads "WELCOME TO /po/". Below the speech bubble, there is a character with a mustache and a helmet with a swastika on it, holding a gun. This character is facing a smaller figure, who appears to be a young man with a paper airplane in his hand. The smaller figure is wearing a t-shirt with the word "KKE" written on it. The background of the image is plain white. The style of the image is reminiscent of political cartoons, often used to convey satire or commentary on current events.]

(<http://www.express.co.uk/news/world/733786/EU-army-NATO-secretary-general-Jens-Stoltenberg-plan-laid-to-rest>)

I doubt Trump is leaving Europe undefended. Germans cannot afford a military buildup, France and Britain are too eurosceptic to allow it.

I think it's safe to say EU Army is going to be just more pandering to NATO, Merkel is just postering because her hand is shit and everyone is calling her bluff.

It's been a while anon5, good to hear from you again.

What do you think of Trump's transition process so far? The media is playing up all the establishment figures he's meeting with.

Is our endgame to get the globalists to slowly knock each other out through their own stupidity then?

>EU army is seperate from NATO

The article I linked talks about the NATO Secretary General basically shitting on the entire EU Army idea, calling it ridiculous.

The U.S is never going to leave Europe on it's own, Trump called the NATO chief and definitely reinforced that.

The only ones who would actually make up a EU army are France and Britain (who both have nukes and aircraft carriers), and both countries have shown disinterest in the idea.

All-in-All, Trump already talked to her, and she seems less abrasive than before; she knows it's folly to try and force Europe to do anything anymore.

[The image depicts a surreal scene with a central pyramid-like structure that appears to be made of stone or concrete. The pyramid is illuminated by a bright, radiant light source that emanates from the top, creating a halo effect around the structure. The light source is surrounded by a swirling, colorful pattern that suggests a cosmic or magical atmosphere. Surrounding the pyramid are three smaller pyramids, each with a similar design and color scheme. The background is a gradient of purple and pink hues, with a gradient of blue at the bottom, suggesting a twilight or dawn setting. The overall composition of the image conveys a sense of mystery and wonder, with the central pyramid being the focal point. There are no discernible texts or inscriptions within the image. If you think the Left & MSM freak out over Trump winning is a sight to see, you should see/hear whats going on with the Globalists/Globalists who fund them & are mad Trump won. They are generating enough salt to make truckloads of Oysters Rockefeller.

The Globalists/Globalist groups who are mad about Trump winning are acting so irrationally stupid & everything they try keeps backfiring on them..... they are becoming embarrassments in the Globalist community for there behaviors.

Lets put it this way, they are acting so utterly stupid, that globalist groups on different spectrum ends who normally wouldn't talk to eachother, are laughing together about it. Also they are starting to distance themselves from the irrational group/members.

Now there are Globalists/globalist groups who don't like Trump, however.... they are not freaking out and acting irrational about his win.("We have standards & don't throw a

tempter tantrum, when things don't go in a way that we like".)

I have one question for you:

What is your opinion about Peter Thiel? Do you consider him "good?"

Some people have insisted to me that he is a bad apple because of his running Palantir/doing CIA stuff but I think they look at it too black and white.

From what I have read in these threads and my own research you can tell how good/bad they are by their actions.

"OWO" types who started the LEO/UN are generally about pure control and are bad.

"NWO" groups are more focused on things like technological advances/things which are more likely to help humanity and bring benefits to them.

Others still might be in the game for stuff like just making money, there are groups on Wall Street into that kind of thing.

Anon5 probably could help elaborate more than I could.

[The image is a black and white photograph of a man's face. The man has a beard and is looking directly at the camera with a slightly furrowed brow. His eyes are wide open, and his mouth is slightly open, giving the impression of a surprised or intense expression. The man appears to be middle-aged or older, with a receding hairline and a well-defined jawline. The background is blurred, suggesting the focus is on the man's face. There are no discernible texts or logos in the image. The style of the photograph is realistic, with a shallow depth of field that blurs the background while keeping the man in sharp focus.]

I had found the book a year prior to his threads from a nautil.us article on consciousness. The theory itself is old and wasn't getting a lot of press until very recently. I'm trying to figure out why. My guesses are that it could be either a psy-op or just a natural byproduct of the question of consciousness being brought back into light because of AI.

Nice. I did my second read-through of the book after his threads. Then I discovered a book called The Master and His Emissary by Iain McGilchrist that not only elaborated on the subject but also postulated a different overall conclusion from Jaynes' - namely that the separation between hemispheres has actually gone too far and is now hindering us. McGilchrist also did a very interesting Ted Talk on the subject:

I think HLI may be involved in some branch of gnosticism, but what I found odd about him was how lot of what he said echoed Carlos Castaneda's material. This actually alarmed me a bit because Castaneda's teachings are very real and very dangerous. They're also very compatible with gnosticism.

[The image is a colorful illustration that depicts the structure of Freemasonry. At the top of the image, the title "The Structure of Freemasonry" is written in bold, black letters.

Below the title, there is a large illustration of a grand staircase with various figures ascending and descending it. The figures are dressed in traditional Masonic attire,

including robes, hats, and masonic symbols. The staircase is flanked by two columns, each adorned with a masonic symbol. The illustration is divided into two sections. The upper section shows the figures ascending the staircase, while the lower section depicts the figures descending the staircase. The figures are arranged in a symmetrical pattern, with some figures on the left side of the staircase and others on the right side. The background of the image is a light blue color, and there is a depiction of a large, ornate building with a clock tower in the distance. The building has a golden hue and is surrounded by a blue sky with clouds. The overall style of the image is reminiscent of vintage or historical illustrations, with a focus on the architectural details of the building and the Masonic symbolism.]

do you think flat earthers are a psy-op? I'm honestly convinced that I'm peddling the truth with this stuff. the catholic church does everything it can to undermine the bible and disregard the teachings of jesus

the gospel of judas predicted that all 12 disciples of jesus would be used to lead the world astray from the true path, what you said about kayne was very enlightening and gives me hope for the future.

i've been convinced through astronomy and basic logic that we live on a flat motionless plane, and the church that started the round earth lie was the original psy op as it would condition people to be told what to think, instead of how to think.

i really think the flat earth is the ultimate red pill as it completely shatters the illusion set by the forces you are fighting.

What do you think it was co-opted from? It's really just the seal of Saturn- for some reason, they worship Saturn. My guess is that once he became involved in studying the occult and started taking drugs/doing rituals, he came into contact with a "conscious inorganic intelligence" that gave him the rest of the "practices" he put into his books. His methods are dangerous because they work. He was an embarrassment of an individual, but it doesn't make what he left behind any less of a danger for those who try it.

dont quote revelations 2:9 and 3:9 at me without even getting it right, and disregard the rest of the bible, that makes you a stupid fucking hateful nigger

when the bible tells you this is a flat motionless plane, i went outside , and conducted a million experiments to prove this, and that there is no measurable curvature

peter wasn't owned by the jews. he rebuked Jesus in Matthew after Judas's betrayal, so jesus called peter for what he was, an emissary of satan. the catholic church always has been, and always will be a seat of satan due to Peter's pride, and has led all of christ's followers astray just like the gospel of judas said it would.

and to top it all off, the jews aren't jews in the first place, they're edomites, and they also reside in parts of the scotland ireland (redheads) where bestiality and wife beating are common.

Few questions, glad you're here

1 It's difficult for animals to grow super large because of gravitational burden, this can be connected to the magnetic field of earth right? If animals were larger and antarctica was iceless —does this mean life has lived through polar shifts in the earth's magnetic field?

2 Do you envision globalist child trafficking to continue unabated? How long has this practice gone on?

3 What should we look for AFTER the electors vote but BEFORE inauguration?

4 Does Hillary have a mental illness which prevents her from realizing her own inaptitude? Or is it part of a 'front'?

5 Is Obama warming to Trump, or does he just hate Hillary? His presser today was less obnoxious than usual...

Right, there is no such thing as a real Jew anymore.

What part of the Bible suggests that the Earth is flat?

"Jews" aren't a real thing, only Satanists, so I don't disagree with you about anything involving Peter of the Catholic Church, what I'm saying is that the Catholic Church doesn't own "Jews", they're just all a bunch of lying Satanists with different roles.

You're so blue pill'd if you think red hair has anything to do with kikes, but you are right that there are kikes in Scotland and Ireland. Celtic culture is all derived from Satanism.

To prove that the Earth is not flat, several people need to go to different areas and at the exact same time, measure the length and angle of a shadow cast by a ruler being held upright on the ground. The more people you have, the more accurate your data will be. The shadow of each ruler will show you at what angle the sun is hitting it and by plotting all of the various measurements, you can see the shape of the Earth is a globe.

The character has long, dark hair that falls over the shoulders, and the hair is styled in a way that it appears to be flowing down the sides of the face. The character's eyes are wide open, and the eyebrows are slightly raised, giving the impression of a focused or contemplative expression. The character's nose is slightly pointed, and the mouth is closed. The character's skin tone is a deep brown, and there is a red mask covering the upper half of the face, which is outlined in black. The mask has a sharp, angular design with a pointed tip. The background of the image is a gradient of dark colors, which contrasts with the character's skin tone and the red mask. There are no discernible texts or additional objects in the image. The style of the illustration is cartoon-like, with a focus on character design and expression.]

They don't want people to learn that these entities of mythology are real because inevitably people will start realizing that everything could be real including all of the religious stuff. Once people are believing in Satan, God and even the possibility of the Tribulations coming to pass, they'll just start asking more and more questions and putting more puzzle pieces together and it would blow their cover.

You can find giant remains in North America, Russia, Asia, Turkey, etc. They're all over the place, don't search Google Earth that's retarded, just look it up and read about it. I posted a video above about Michael Tellinger showing a giant femur found in Turkey.

Dinosaurs are not giants birds, giant birds (called terror birds, there used to be gigantic ones all over the Earth even in the last 10,000 years that would swipe people up and kill them) are just another creature in the family of creatures that dinosaurs and things like that belong to. Notice how all of these monsters are like some sort of reptoid/amphibian esque creatures.

There isn't anything connecting red hair with edomites. I'd love for you to provide a source saying otherwise. The name is derived from it's founder who was named Esau because he was born "red all over"- meaning he had reddish skin. Nothing about red hair.

It's blue pilld because you don't understand that red hair has a very real and very significant history relating to the "Aryan" race, giants, Nephilim, fallen angels, etc.

I read the Bible every night, and I've never seen anything suggesting that the Earth is flat. If you're so sure I don't know what's so difficult about just citing the source.

I believe that the Earth is round because I have done the math myself and seen it with my own eyes. I don't know what else to tell you. I know that NASA is lying, I just don't think they're lying about what you think they are.

I've been following you for a while, that's a generic response you give frequently.

On one hand, you're pretty on the nose about stuff, but it's in a vague way that's not
very useful. I think you essentially echo board consensus and mix in real world events
and educated guesses.

On the other hand, when confronted it sort of breaks down and you come off as a cold
reader.

So I need some information that will sway me to either side. Keep calling me a psyop, I
stop listening. Provide that information and I invest time and energy into your thing.

Hey A5, I have a theory as to the whole Antarctica thing that I hope you can assist with.

There have been several sentient species that have come before man in the several eras before our rise. Many of these species went along the same path we are on now technologically speaking and eventually hit a technological singularity.

However, rather than completely evacuate the Earth, a coalition of "hyper-sentient" beings remained to assist the next era of sentient species. We are the next in line. This is where the story of gods come into play from our ancients. The feathered beings, flying chariots of fire, giants, etc. were literal documentations of events our ancestors witnessed. They have helped us through various points in history, and we are very close to reaching "hyper-sentience", allowing them reveal themselves after thousands of years of work.

The hollow earth theory is a partial truth. Partial in the sense that Earth truly is cored out with a vast network of tunnels and caverns connected various underground cities together in order to minimize surface time (and not be detected by man). The Northern and Southern poles are the largest entrances though they are still relatively small

compared to some of the tunnels they connect to.

Nazis possibly accessed this network prematurely and vowed to not reveal the "prime directive" until the technological singularity occurs, then they will head the reveal, along with other humanoid species to soften the panic that always occurs around this time for all species.

Am I on to something?

The pyramid is illuminated by a bright, radiant light source that emanates from the top, creating a halo effect around the structure. The light source is surrounded by a swirling, colorful pattern that suggests a cosmic or magical atmosphere. Surrounding the pyramid are three smaller pyramids, each with a similar design and color scheme. The background is a gradient of purple and pink hues, with a gradient of blue at the bottom, suggesting a twilight or dawn setting. The overall composition of the image conveys a sense of mystery and wonder, with the central pyramid being the focal point. There are no discernible texts or inscriptions within the image. Globalists/Globalist Groups have so many plans(and in some cases members who have there own plans) going on, that toes tend to get stepped on & they start to mess with eachother directly and/or indirectly.

For instance, Globalists are trying to pull back from the US to reinforce the EU, however they already have multiple plans going on in the EU compromising there fall back/re-position plans.

The Globalist community isn't just "the jews" as many of you have been lead to believe, it consists of many many groups that have alot going on & different motivations/purposes. There are Mergers,Take overs,retirements, power plays, coups, infiltration, sabotage civil wars, wars, dozens to thousands of plans(varies between groups/people) etc happen behind the curtain, as much as the world stage.

The old globalist whale system is bleeding, and the newer globalist sharks of the new systems are going to take advantage of that and with each bite(depends on the shark size, including megalodon size) they will be shuffling power structures and regional controls among other things.

In the long term, making sure Trump is protected & successful during his terms in office, will benefit people on both sides of the Curtain dividing the world stage(The public systems/existence), from the back stage(Globalists systems/existence) due to positive changes & clean outs.

The point I'm trying to make is that the as interesting as the World Stage is, the Backstage is also quite interesting as time goes on

1) been starting to document the NATO storage. They have huge facilities from the Cold War they are using.

2) Are there EU army bases that are publicly acknowledged? I'd imagine they would not be labeled as such. I'm assuming I'd find these locations in places where we have been sending tiny contingents of military forces?

Also, is it safe to assume that the Eastern European states in NATO/the EU would stick with the EU in the event of the conflict we are trying to prevent here?

In regards to that church shooter I have no idea, he certainly doesn't fit the mold of a shooter and most of the videos showing him "target practicing" are just him shooting a pistol into the ground 5 feet away in his yard. It doesn't add up.

I'm still in the opening phase of documenting it all.

- Use the left to set an absolutely horrific tone for what "their" globalism would be like (mass immigration, potential terrorist attacks, MASSIVE moral declines, massive amounts of degeneracy, Communism, poverty, etc.).
- Give the general public a taste of it (the past 8 years within Europe/America/Canada/Australia/etc).
- Globalists know the average human being will reject this proposal obviously.
- After rejecting liberal globalism, globalists offer the general public a much more conservative globalist proposal (knowing the public would much rather have it, than the liberal one offered before).
- All in all, Conservative Globalism (something the public would've NEVER accepted before all of this began) is now accepted with open arms by the general public.

What do you think?

Is the porn addiction factor similar to the "birth control fucking up women" thing that you've touched on? If someone has been highly addicted to porn, can they eventually return to normal or does the adrenal overload fuck your brain completely (a la drugged feminists).

Please tell me the brains neuroplasticity can overcome porn even if it won't let women overcome birth control brain damage.

1) "saur" just means old.

2) In dinosaur names(such as T-rex) it means "lizard", which is incorrect since

Dinosaurs are Birds.

3) Dinosaurs have always had Quills/feathers, but everyone was so focused on the bones & not looking at the rocks around them to find that out.(And in some cases when they found out, they covered it up & various private collectors have proof showing that feathers & quills have always been around).

After Trump won they called me in for a meeting because I was apparently the only person they knew who foresaw it.

So from my understanding regarding this recent kidnapping - Soros, through BLM finds some chiraq "kids" and puts them in a scenario in which they are to torture and execute a white male while live on FB. This blows up, and most likely would be the last straw for many far-right types. They would then show up to the poor neighbourhoods of Chicago, start shooting, the patrons of the hood shoot back and bam there's a racewar to profit from? Did these "kids", through their misguided actions just prevent a racewar, thus making them good guys?

>find a woman who is likely to be easily tamed

kek, "likely" to be tamed; you can do it anon, just takes a strong hand at times; when you are ready for it, check out talkaboutmarriage forums and MarriedManSexLife. Men are meant to be the head of household; once that is established, you will need to keep establishing it, but the right woman will respect it.

Source; found a woman who could be tamed almost 20 years ago; things turned out well.

Look at the designs/appearances & actions/motivations of the characters.

They very much reflect The Left & The Right.

The Joker(The Left) wants Chaos & Death(including death of himself).

The Batman(The Right) wants Justice & to keep things safe from people like The Joker(The Left).

Hey Anon5 I just wasted the past hour on your archived thread about dinosaurs trying to figure out what the fuck you were even on about since you dismissed every possible implication presented to you with just repeating "No, dinosaurs = birds" over and over again. What the fuck are you smoking and where do I get some?

Alternatively if you're willing to actually divulge information and not just give unfalsifiable vague nonanswers, are any of the following true?

>Dinosaurs being large birds, coupled with the existence of large plants and large insects in those times, implies the existence of larger versions of all animals, which implies giant humans.

>Large, carnivorous birds without feathers would account for dragons as referenced in

myths around the world.

Are either of these correct?

Let me explain.

All Dinosaurs had feathers/quills.

The "Saur" in Dinosaur is incorrect due to "Sasur" just meaning old or in some dinosaur

names Lizard. Which is incorrect since Dinosaurs are Birds.

That is all the thread was about.

Also "Dragons" are really about people digging up dinosaur skeletons and seeing feater/quill & skin impressions around the bones.

Thats where the myths & Stories about Dragons came from.

Aaaah i have things to do.

You said that empowering Western Women was done to create a reaction in White Males and crush them.

So let's analyze Gamer Gate:

>identify a high concentration of WM spending their life playing videogames

>insert WW in the industry, empower them, create scandal

>now you have a lot of enraged WM

>repeat with Ghostbusters 2016

And so on.

Now you said that this social engineering got mixed up with someone who had different reasons to push women empowering. I'm gonna assume it's the feminist globalist group you talked about, the 8 goddesses or whatever.

Now another country where the 8 goddesses operated was South Korea. If I remember correctly feminists started passing some retarded laws against Playstation store.

Probably it wasn't even intentional and they were just trying to sabotage Japanese competition. But maybe just maybe it was the testing ground for Gamer Gate.

So why don't you tell me what was so "fascinating" about the graphic? Why don't you ever go into any amount of detail about whatever subject it is that you are referring to? What you are doing is the oldest con in the book. Folks such as yourself used to be tarred and feathered back in the day. Pray tell... do you have any Tarot Cards you'd like to lay out on the table, oh wise one? kek

[The image is a stylized, abstract representation of a face with a predominantly red color scheme. The face features a large, bold, and somewhat distorted red eye that dominates the upper portion of the image. Below the eye, there is a red, jagged line that extends from the center of the eye to the lower edge of the image. The rest of the face is filled with a red, wavy pattern that creates a sense of movement and energy. The background is a solid red color, providing a stark contrast to the face. In the lower right corner, there is a small, stylized letter "S" in a red color that matches the overall color scheme. The image has a bold and dynamic feel, with a strong emphasis on the red color and the stylized elements.]

One thing the shills never do is attack deep foundations in your arguments and they never observe the Principle of Charity. They just flail at surface structures and/or distract with the /pol/ equivalent of stupid fart jokes.

But never any focused, reasoned arguments that ever involve you getting any credit for things getting to this point of general notoriety. Even a troll would respect what you've done even if they think it's just trolling. Paid shills are so easy to spot, aren't they?

Motivations of the joker.

The Joker simply believes in chaos and disorder while Batman stands for justice. These two concepts are diametrically opposed to one another in Nolan's Batman universe, and it leads to a perfectly natural, completely inevitable collision between the two that doesn't feel forced or artificial in the least. It's simply what has to happen: a clash between 'an unstoppable force and an immovable object,' and it makes all the sense in the world that it plays out the way it does.

This supposed ambiguous motivation works so well precisely because the plot eventually becomes centered on this very question. We're actually meant to struggle with the question of 'What is motivating the villain?' while the protagonist does as well.

The brilliance of having this kind of villain is that, even when he's in the middle of his cat-and-mouse game with Batman, he's free to make a point about the morality of Gotham's citizens.

The Joker's actions have an incredibly far-reaching, unforeseen effect as Batman is forced to give up any pretense of being a hero in the public's eye and falsely accept the blame for Harvey Two-Face's death and his crimes. It's safe to say that had the Joker's motivations been anything else or less defined, none of this would have been possible.

This Batman stays true to his character as he sacrifices almost everything he has left in order to protect the people and city he loves.

How accurate is this theory?

The "modern left" has more and more crazies thinking they're "on the right side of history" everyday due to frontal lobe damage and social engineering.

Every few weeks or so the leftist government or leftist mainstream media will push some non-issue into the public zeitgeist that only these crazies could or would care about.

Through the response to their fake "cause of the month" on social media / in protests etc they are able to gauge how much of the population is essentially already at the "good guy" stage of social engineering.

No critical thinking skills, weak willed, controlled by dopamine receptors, emotions and the need to fit in socially.

They are constantly doing this to get a feel for how much of the population is still of good moral / mental stock. Once the crazies reach critical mass, an event will be triggered (IE fake alien invasion or nuclear war). In the resultant chaos, the crazies will be used to attack and remove the last few good guys and gals.

NWO engaged, since no one will have the mental facilities to try and make meaningful change.

OP I'm sorry people have been so hateful towards you. I can tell you're young and starting to wake up, wrestling with the cognitive dissonance you are experiencing.

You're putting the pieces in the right place, but missing the big picture. The Joker was never intended to symbolize the left nor Batman the right. They are not political allegory, but there was a more Gnostic intent.

Batman symbolizes the rebellious and virtuous American, specifically he is the American spirit. He lives for REVENGE and has NO FEAR. This has special meaning in certain occult circles.

Check out this article, Jay's Analysis is always spot fucking on:

<https://jaysanalysis.com/2011/02/23/batman-and-the-joker-as-the-apolldionysos-archetypes/>

<Batman and The Joker are facing (The Joker upside down), which makes for a very yin-yang imagery: as above, so below. The Joker reveals that he doesn't want to destroy Batman. He needs Batman. And they are destined to partake in this Apollonian/Dionysian duality duel for eternity. Their Nietzschean relationship has come full circle.

It seems a lot of the "jokers" or liberals entire "political" platform is dependent on them having enemies, IE people that are critical / in opposition of their ideals / values.

Would ignoring everything from the liberal side and simply providing good info to the undecided be best, or is paying into their victim mentalities and attacking them directly beneficial? Seems like they are only emboldened when someone attacks them or their ideas.

[The image depicts a surreal scene with a central pyramid-like structure that appears to be made of stone or concrete. The pyramid is illuminated by a bright, radiant light source that emanates from the top, creating a halo effect around the structure. The light source is surrounded by a swirling, colorful pattern that suggests a cosmic or magical atmosphere. Surrounding the pyramid are three smaller pyramids, each with a similar design and color scheme. The background is a gradient of purple and pink hues, with a gradient of blue at the bottom, suggesting a twilight or dawn setting. The overall composition of the image conveys a sense of mystery and wonder, with the central pyramid being the focal point. There are no discernible texts or inscriptions within the image. The style of the image is digital art, with a focus on surreal and fantastical elements.]

The Globalist use The Left as a destabilization movement, destroying society both figurative & literal. The Left in the grand scheme are use Useful/Expendable Idiots, but The Left have killed many Millions in History.They are extremely volatile & even will turn on themselves.

The Left are made progressively(and are moving to be) more Radical to point(which we are starting to see now due to the results of multi-prong Social Engineering) they are becoming Terrorists & working with Islamic terrorists to destroy the West. Soon you will see terrorism committed by The Left. They are a internal/traitor force working with foreign threats to destroy the Tribe of the West.

While the Globalists use The Right as a "clean up" operation of The Left when needed, The Right is handled differently & what is done to it is different.

The Right is kept contained/held back & passive/non-violent, exploiting there Morals & good natures. It is done because The Right gets progressively more battle-hardened & more aware of tactics being used against it(such as to try to break it up) overtime, making them able to resist Globalist actions significantly more then the general population & most certainly The Left.

The Globalist use The Left as a destabilization movement, destroying society both figurative & literal. The Left in the grand scheme are use Useful/Expendable Idiots, but The Left have killed many Millions in History.They are extremely volatile & even will turn on themselves.

The Left are made progressively(and are moving to be) more Radical to point(which we are starting to see now due to the results of multi-prong Social Engineering) they are becoming Terrorists & working with Islamic terrorists to destroy the West. Soon you will see terrorism committed by The Left. They are a internal/traitor force working with foreign threats to destroy the Tribe of the West.

While the Globalists use The Right as a "clean up" operation of The Left when needed, The Right is handled differently & what is done to it is different.

The Right is kept contained/held back & passive/non-violent, exploiting there Morals & good natures. It is done because The Right gets progressively more battle-hardened & more aware of tactics being used against it(such as to try to break it up) overtime, making them able to resist Globalist actions significantly more then the general population & most certainly The Left.

Hello, the term globalists seems like it is a vague catch all. I like history and was just wondering if you could use the Roman civil wars as an analogy for the current struggle for global dominion. As there was caesarian faction vs. Pompeian faction, then later Augustus vs. Antony. They would both be soliciting backing from various other powers around the ancient world like the ptolomeys in Egypt who played a roll in both wars.

Also just as another example, Crassus was killed on his expedition against Parthia, I don't find it that far-fetched to believe that Caesar or Pompey had some sort of deal or non-aggression pact etc with the Parthians as thanks for the elimination of one of the triumvirs.

Is this a good way of thinking about the globalist structure? Some of the more obvious ones are the Saudis/Muslim Brotherhood, and then I guess there would also be technocrats, Russian groups, Chinese groups, Indians, etc. Lots of shifting alliances/betrayals out of convenience/necessity/opportunity.

Hope that makes sense, sorry if kind of rambling.

Also in another thread you mentioned globalists have their own memes. Are you just trolling us for you and your globalist buddies lulz are you ;__;?

Here's a little bit I know from reading since that one knowledge bomb where you mentioned pheromones.

-Androstenol is a potent male pheromone and some colognes have it. I haven't seen any actual research on men producing it, just small studies of men getting cologne. But how do they produce the androstenol for the cologne?

I ordered one androstenol cologne online and I'm going to try it. I work in a restaurant so I have to deal with a lot of customers.

-Testosterone (and male sweat) smells sweet to most women. I can't stand the smell of other men. They don't smell sweet to me, just strong, unpleasant body odor.

My ex-girlfriend used to wear all my dirty laundry after I threw it in the hamper. She would keep doing this for weeks even if the clothes reeked of body odor and I wanted to wash them.

-There's something about the Old Spice smell. Some women love it and the rest don't care.

The Globalist use The Left as a destabilization movement, destroying society both figurative & literal. The Left in the grand scheme are use Useful/Expendable Idiots, but The Left have killed many Millions in History.They are extremely volatile & even will turn on themselves.

The Left are made progressively(and are moving to be) more Radical to point(which we are starting to see now due to the results of multi-prong Social Engineering) they are becoming Terrorists & working with Islamic terrorists to destroy the West. Soon you will see terrorism committed by The Left. They are a internal/traitor force working with foreign threats to destroy the Tribe of the West.

While the Globalists use The Right as a "clean up" operation of The Left when needed, The Right is handled differently & what is done to it is different.

The Right is kept contained/held back & passive/non-violent, exploiting there Morals & good natures. It is done because The Right gets progressively more battle-hardened & more aware of tactics being used against it(such as to try to break it up) overtime, making them able to resist Globalist actions significantly more then the general population & most certainly The Left.

Diversity + Proximity = War

Thomas Jefferson recognized and remarked that black and white people would never be able to coexist peacefully in the same state.

I am looking clearly at the state of affairs. The sheer amount of Jews operating at the highest levels of many crucial industries and spewing their Cultural Marxist cancer cannot be disguised or thrown under the rug. They, along with many others; are corroding our civilization's very foundation. So my question is this:

Given a New American Revolution, globalist gangsters are removed from possessing any influence over our government or our military, would it not make sense to implement National Socialism and create a stronger race? Even without murder, mandated emigration to Israel or Africa. How would that not create a healthier and more cohesive country?

[The image is a black and white line drawing featuring a simple, cartoon-like character. The character has a round head with a simple facial expression, consisting of a neutral expression with a slight frown. The character's body is elongated, and it appears to be standing upright. The character's hands are clasped together in front of it, with one hand

slightly raised, as if in thought or contemplation. The character is holding a small, round object that resembles a coffee cup, with a handle on one side and a spout on the other. The handle is positioned on the right side of the character's hand, and the spout is on the left side. The coffee cup has a small amount of steam rising from it, indicating that it is hot. The background of the image is a solid, light blue color, providing a contrast to the black outlines of the character and the coffee cup. The image does not contain any text or additional elements. The style of the image is reminiscent of a meme or a cartoon, with a focus on the character's contemplative pose and the coffee cup.]

Roman elites split into factions and solicit support from various powerful interest groups (merchants/foreign kingdoms/etc) eventually leading to a civil wars for supremacy of Rome (fall of the republic, Augustus becomes first emperor.)

Just wondering if that would be a good analogy for current world situation, just mentioned potential globalists groups like Saudis/Muslim Brotherhood, technocrats, Russians, Chinese, etc. Power ebbing and flowing between different alliances of convenience/necessity/mutual goals in a shadow war for global supremacy.

The last part was a joke, you mentioned that globalists have their own memes, and was wondering if you are just trolling us for lulz.

The lefts seem to shirk responsibility for their own, and their group's collective actions every chance they get. I'm starting to believe the entirety of the modern leftist political platforms revolves around taking no responsibility for anything, taking away responsibility from minorities, and a perpetual victim complex causing them to see everyone not identical to themselves as enemies.

Mr 5, some things seem really fishy about Girl Meets World.

Rowan Blanchard (Riley) looks like she could be Ben Savage's (Cory) daughter. Most of the young actors seem way too good at their parts, like this is how they are in real life. They're not acting.

And the show being cancelled so soon? Rowan is being groomed to be a feminist icon and she was at the march yesterday. She's only 15 and she is way too good an actor, not to mention how fast they seem to be promoting her. I'm going to follow her and see if there's any pizza stuff I can uncover.

Sabrina Carpenter's (Maya) performance seemed way too real, like she really did grow up with an absent father and overworked mother. She's from the Lehigh Valley area (Taylor Swift was born in Wyomissing) and she got discovered after participating in a singing contest hosted by Miley Cyrus? And she became a popstar in her tweens? Sounds like a cover story.

It's a shame because Girl Meets World is a really well-written show. But I'm going to keep digging.

back in my early 20's I dated a girl, whose sister was contracted to Vivid porn. she had the closest thing to a slave labor contract that I had ever seen. they could literally pay her in DVD's that she appeared in, at MSRP. but most of the time they paid her in drugs and wrote it off as promotional assistance for her stripping. she was so fucked up in the head she didnt realize what they were doing to her, and how she had to give them a cut of her stripping money, because they owned her "persona" as an "adult entertainer".

the guys are junkies and goons from local gangs and criminals that get to fuck these

girls as a reward for doing really fucked up shit elsewhere.

she died from some bad dope in 09, and it wrecked their family even worse.

what about the actual movies Hollywood produces? I would presume they have similar subliminal messages and shit put into them yes? If so, how bad and/or prevalent are they? Does this just go for multi-billion dollar blockbusters or does it also extend to independent/foreign/arthouse/"auteurs"? Is it bad enough that you would say people should avoid watching movies like they should avoid watching porn, or if you just keep an open mind and sense of awareness you'll be fine?

they're killing themselves in retaliation to their own delusions

interesting. is this just for the big multibillion blockbusters, or does it also count for smaller auteur/independent/arthouse stuff (i would assume it depends)?

what about Christopher Nolan? i've also gotten the vibe from him and his movies that he's a pretty conservative guy, in an old-fashioned family values kind of way who's method of making movies and message contained within seems subtly but definitely divergent from the Nu-Hollywood ideology and way of doing things. if i'm not completely far off in my assessment of the man, how did he get to be like the biggest director in the business? what is his relationship with the rest of the (((industry))) behind the scenes?

You can help them by your default proximity to their life. That already right there gives you a huge advantage.

First have it be known that you are an upstanding and outstanding individual. Then let it be known that you believe certain things that are unexpected. Don't push it though. It really takes alot of trust, an unordinary amount, before someone will listen to a "conspiracy theorist" seriously.

It sucks, but the power of the illuminati is such that you are forced to operate in the Overton Window they set, at least for awhile. But you can still have a great impact in that window, if you're smart enough and knowledgeable enough.

It's important to emphasize in this that our goal includes converting white women to our point of view, not alienating them categorically and creating another Team A vs Team B mutually exclusive, utterly fruitless identity conflict in society.

I.E. don't just attack them like a mad animal. Do it in a way that actually converts them

to our outlook. Every woman on our side will bring 5 more, because they are conditioned to pay more attention to things other women say, compared to us.

Dark occultists who rule the world rule on creating an imbalance between these principles. The left is overtly nice, and the right is overtly authoritarian and sometimes destructive. Anon5,

Do you know anything about

www.whatdoesitmean.com

Website run by some Sorch Faal. I read it daily, and they really write interesting stuff connecting all daily events to incredible "high level insider" information from Russian Security Council. They cite sources from all kinds of links and connect the dots, such as, that Obama and Trump worked together to bring down the Clintons and Bushes, which is why Bush Senior didn't show up to the inauguration, because he 'went into hiding.'

Is this website a honeypot/ LARP / or actually has truth to it?

The pyramid is illuminated by a bright, radiant light source that emanates from the top, creating a halo effect around the structure. The light source is surrounded by a swirling, colorful pattern that suggests a cosmic or magical atmosphere. Surrounding the pyramid are three smaller pyramids, each with a similar design and color scheme. The background is a gradient of purple and pink hues, with a gradient of blue at the bottom, suggesting a twilight or dawn setting. In the 2016 Election they over-committed/extended, and that ended up being the straw the broke the camels back for some of them. Before the 2016 Election they were declining for various reasons(such as newer/other globalist & tech) but they had so much riding on Hillary getting in that when she lost, it messed them up.

Which is why you are seeing them working with Asian Globalist groups(This relates to the Rise in China & all the regional power plays around it) now. Expect some eventually double crossing on both sides, especially since the US/EU Globalist groups(Who are working with the Asian ones) need the Asian Globalist groups more then the other way around. The EU/NA Globalists involved also screwed themselves in a way if the Asian Globalists cross them, take them over or go after them, due to them burning many bridges with US/EU Leaderships and other EU/US Globalist groups.

As for Soros(George & Alex), Destabilization is what they do. US & EU destabilization efforts are still going on & en progress. They see chaos as a opportunity & a business.

one of the other threads you talked about climate change/renewable energy being a hoax to try to thwart industry/energy production

that sounds really retarded though mainly because the main concern is changing the way we go about get energy to one that does not pollute or run out rather than limiting energy production

I believe you also said that China is pushing it because they specifically want to cripple our industry, but if that's true why are they leading the charge for renewable energy for themselves?

Keep in mind that their destabilization is selective with purpose. Soros wants a world where he and others like him can literally live as the International Jew, traversing across borders unhindered, commanding acceptance with locals as a fellow citizen, or better yet, as a privileged minority with special protections, manipulating local politics and social trends as he sees fit for fun and profit. And when things get a little hot in a certain country, he can simply waltz across the border to the next one, tug at the right connections to mobilize their armies, crush the rebellion and have them secure and protect his investments. And on top of it all is Israel, purely Jewish, sanctuary and untouchable base of operations for pulling all the strings.

He's controlled opposition, he's harnessing the popular resentment to globalism and convincing people that they have won and beaten globalism. Our family knew of the neocons such as Cheney to be irremediably corrupt and miserable people that did nothing but powerplay shit and coverups. Am I correct in that I'm seeing many of the same people that were behind the neocons have switched to the SJWs?

My family has gotten out of the game so we lost some connections.

1) Is Hillary recently released video to gain support from the protesters in preparation for her arrest?

2) Is the Purge going on in Brazil the latest step of a "multicultural" society? Wanna give your personal analysis?

3) The protest in Romania is assuming all the aspects of a Soros coup. They won't stop until the government goes full pro-europeist.

The shady part is that president Klaus Iohannis is backing the protesters against the government.

<http://www.dailystormer.com/femen-says-george-soros-wont-fund-them-anymore-because-theyre-opening-a-branch-in-israel/>

The rest of his initiatives in Israel are pretty half-assed and ineffective, just enough to make the news but facilitates no political or social change. Almost like a half-assed attempt to prevent everyone from wising up to the fact that there is a Jewish conspiracy to destroy gentile cultural identity.

have you looked into this yet?

<http://www.zerohedge.com/news/6-trillion-us-bonds-seized-zurich>

\$6 Trillion In US Bonds Seized In Zurich, Said To Pose "Severe Threats To International Financial Stability"

Back in the summer of 2009, a peculiar story circulated when two Japanese individuals were arrested trying to smuggle \$134 billion in US bonds into Switzerland from Italy.

The story quickly died down after it was subsequently reported that the bonds were merely fake bearer bonds. Nobody heard much about it since then. Until today, when out of the blue we get a new story which blows that one out of the water. According to Bloomberg, "Italian anti-mafia prosecutors said they seized a record \$6 trillion of allegedly fake U.S. Treasury bonds, an amount that's almost half of the U.S.'s public debt." From here the story just gets weirder: "The bonds were found hidden in makeshift compartments of three safety deposit boxes in Zurich

The U.S. embassy in Rome has examined the securities dated 1934, which had a nominal value of \$1 billion apiece

And really, really weird: "The fraud posed "severe threats" to international financial stability, the prosecutors said in the statement." Ok great, however one thing we don't get is just how can \$6 trillion in glaringly fake bombs be a "threat to international financial stability."

Phony U.S. securities have been seized in Italy before and there were at least three cases in 2009. Italian police seized phony U.S. Treasury bonds with a face value of \$116 billion in August of 2009 and \$134 billion of similar securities in June of that year. The U.S. Secret Service averages about 100 cases a year related to bonds and other fictitious instruments.

As a reminder, total US debt in circulation is just over \$10 trillion. So if the allegedly "fake" bonds were sufficiently threatening to put international financial stability at risk,

just what is going on here?

wtf, like you can bear a child more quickly? Is this related to industrial places that mass produce humans? Would really explain a lot about Truman Show/Hollywood stuff

Notice how Webb plays up the Dyncorp operations in Haiti and the Laura Silsby scandal?

That is to intentionally distract you from the fact that multiple federal agencies, 3+ governments and the catholic church were all involved with the operation that Silsby was working for.

He is a honeypot, he intentionally discusses hot topics and blends them into other issues to distract people from the real players.

2) Well, that explains a lot Truman Show wise. Blowing my mind here, that changes up how I think about the celebs entirely. Much easier to hide a pregnant woman for 5-6 months. Makes sense why female celebs are health obsessed too.

[The image is a digital illustration of a character that appears to be a stylized representation of a frog. The frog is green with a red-orange mouth and a frown, giving it a somewhat serious expression. The character is wearing a blue shirt. The image is labeled as "Figure 12" in the top left corner, indicating that it is part of a larger set of figures or a series. Below the frog, there is a text that reads "The most popular image on /pol/ during our collection period." This suggests that the frog character is a popular image on a platform called /pol/, which is likely a subreddit or a similar online community. The text also mentions that perhaps the least rare Pepe, which could be a reference to a specific character or a reference to the Pepe meme, a popular internet meme. The overall style of the image is cartoonish and seems to be designed for a humorous or light-hearted context.]

1) Exactly.

2) Also they have things that speed up the birthing process if the women don't want to speed up the pregnancy. So they could have a normal pregnancy, but have a fast birth.

Some cases its a combination both being speed up, but that depends on the individual.
